the ninth international workshop on persistent object systems pos 9 took place at the sas radisson hotel in lillehammer norway from 6th to 8th september 2000 previous workshops in the series have been held in scotland 1 and 2 australia 3 the usa 4 italy 5 france 6 and the usa 7 and 8 in keeping with those workshops pos 9 was short but intensive fitting 28 papers and panel sessions a boat 1 excursion and some memorable meals into two and a half days the participants concentration was no doubt helped by the northern european weather that

prevailed for most of the workshop continuing a trend experienced over the previous few workshops pos 9 had difficulty attracting a high number of papers of course it is hard to tell whether this is a problem with the field of persistent systems itself or merely a consequence of the increasing number of workshops conferences and journals competing for submissions in his epilogue to the proceedings ron morrison makes some interesting suggestions for possible improvements to future pos workshops out of a total of 26 submitted papers 19 were accepted for presentation at the 2 workshop breaking down by region 6 1 2 came from the usa 1 from africa 3 1 2 from australia and 8 from europe in a new development for pos an equal number of papers came from england and from scotland

this book investigates the creation and implementation of enterprise information systems covering a wide array of topics such as flow shop scheduling information systems outsourcing erp systems utilization dietz transaction methodology and advanced planning systems provided by publisher

this book is intended to be used as the textbook for a course in computer information systems development and assumes a reasonable understanding of computer concepts terminology and programming it can be used in lecture case or project based classes after a thorough introduction to systems development this text examines the front end and back end phases of systems design when approached in a disciplined manner traditional methodologies along with recent developments in the field are addressed by the application of an ongoing case study that illustrates the chapter topics in a real world setting

this book explores the process of organization and systems design researchers will glean radically different epistemological and ontological perspectives designers will acquire entirely different intellectual tools principles and mechanisms of design and managers should learn to think of organization and systems differently
